Topic Name: **Wedding Photography & Event Planner**

Web Application

Application Name: **The Forever Project**

Introduction:

The history of wedding photography begins in the early 1840s. During this period, photography had very little commercial use, but the idea of creating memories of the wedding day was already born.

Due to the equipment limitations in the 1800s, there was only a daguerreotype portrait on a tiny copper sheet, not like today have paper photographs, multiple photographs, and albums.

Wedding traditions and customs vary greatly between cultures, ethnic groups, religions, countries, and social classes. But one thing in common is that brilliant wedding images could be always memorable for couples and their families and friends.

The pictures today surround us is obvious to everyone who can see. We take pictures with our own cameras and we see pictures taken by others- both amateurs and professionals. Photographs are used by both artists and professional photographers.

Abstract:

This project is aim at developing an online photography web application. This is an internet base web application which will be handled by organisation, where organisation can see customer responses orders etc.

"Forever Project" is destination which provide you all thing at one place. we understand your budget limitations and your high expectations.

we strive to deliver around the best affordable, no matter what special event you have in mind we plan well and

organize all events big or small, we will give our best efforts in every event. our food management team brings exciting menu and exotic taste that too at wholesale price means more savings.

Forever Project provides the best ideas from Event Planning, Management, Production, Group Events, Parties, Decoration (Flower, Lights, Cloths, Tent, Balloon, Props, Selfie Point), Catering Management, Pre-Wedding Shoot, Photography, Videography, Wedding Cakes and many other things as your requirement.

SYSTEM REQUIREMENT:

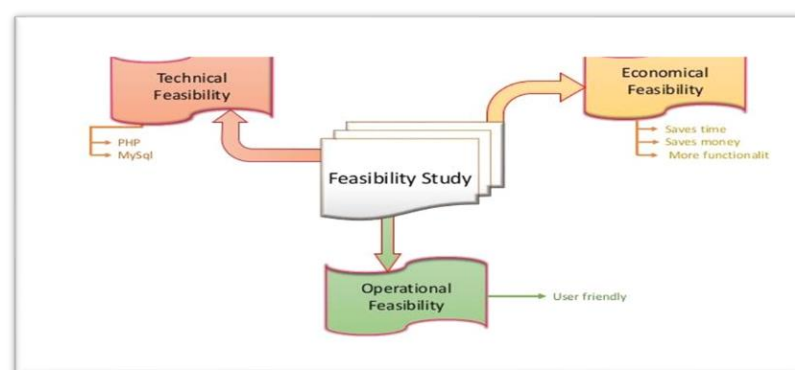

Front End	HTML, CSS, JAVASCRIPT
Back End	PHP, MYSQL
API	Razor Pay Payment Integration
Web Hosting Platform	000webhost.com

OBJECTIVE:

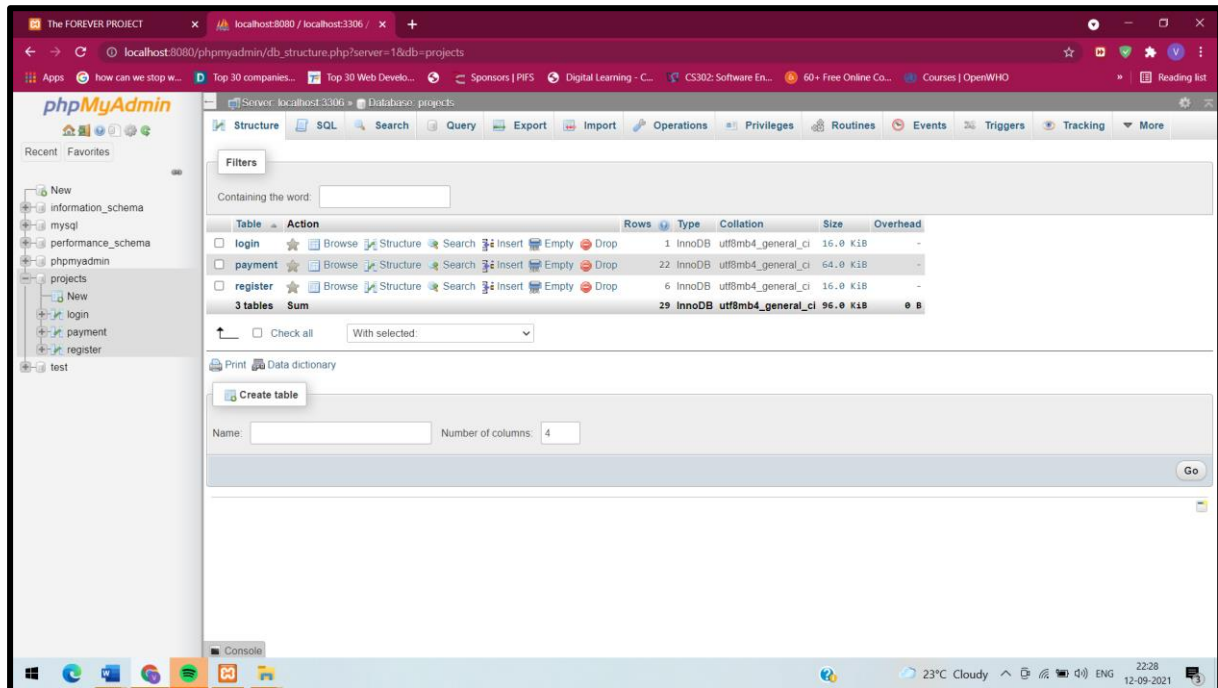

- To create a web application to be used in place of the old system.
- To maintain and improve the skill management for the department personnel.
- To Provide easiest and efficient way for completion of work.
- To ensure transparency in the day-to-day management and administration.

FEASIBILITY STUDY:

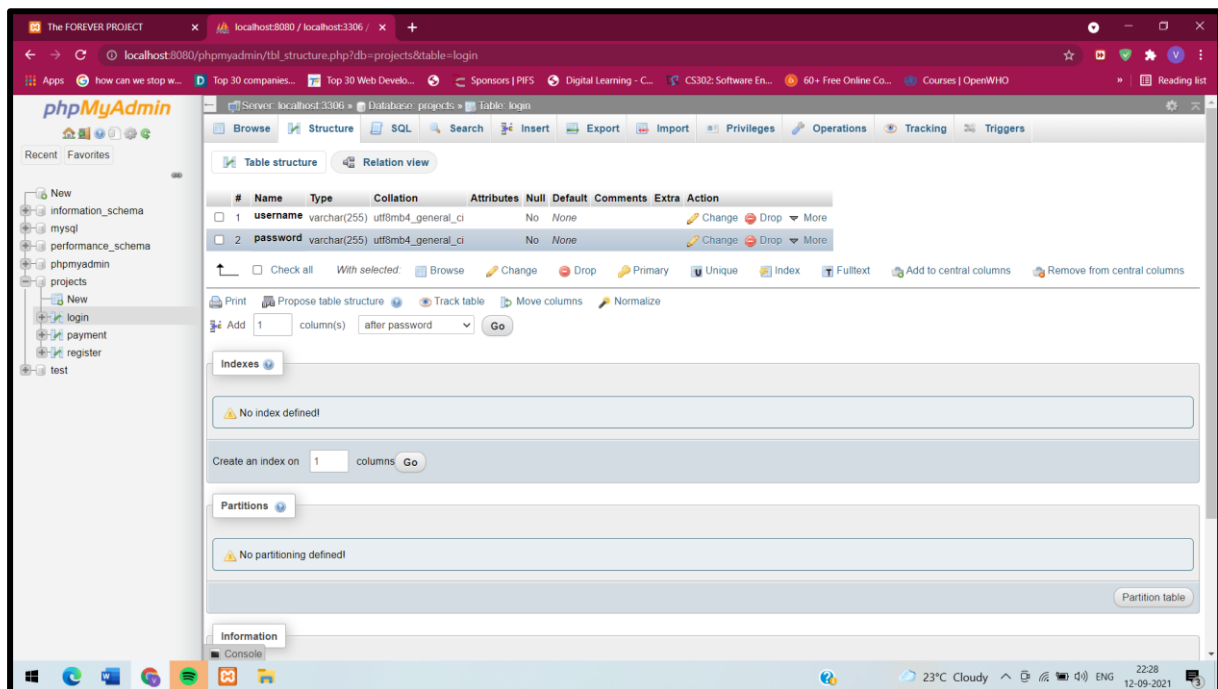

An important outcome of preliminary investigation is to determine whether the proposed system is feasible or not. A feasibility study is a test of a system proposal according to its work ability, ability to meet users need an effective use of resources. It is conducted to select the best system that meets the performance standards. It reviews the alternative solution and its objective is not solving the problem. Three key consideration are involved in feasibility analysis.

DATABASE STRUCTURE:

Login

register

The screenshot shows the phpMyAdmin interface for the 'register' table in the 'projects' database. The table structure is as follows:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	username	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More
2	password	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More
3	email	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More

The 'Indexes' section shows a PRIMARY index on the 'email' column.

Indexes:

Action	Keyname	Type	Unique	Packed	Column	Cardinality	Collation	Null	Comment
Edit Drop	PRIMARY	BTREE	Yes	No	email	5	A	No	

Partitions: No partitioning defined!

payment

The screenshot shows the phpMyAdmin interface for the 'payment' table in the 'projects' database. The table structure is as follows:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	name	char(255)	utf8mb4_general_ci		No	None			Change Drop More
2	email	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More
3	mobile	bigint(10)			No	None			Change Drop More
4	amount	int(32)			No	None			Change Drop More
5	address	char(255)	utf8mb4_general_ci		No	None			Change Drop More
6	state	char(255)	utf8mb4_general_ci		No	None			Change Drop More
7	zip	int(255)			No	None			Change Drop More

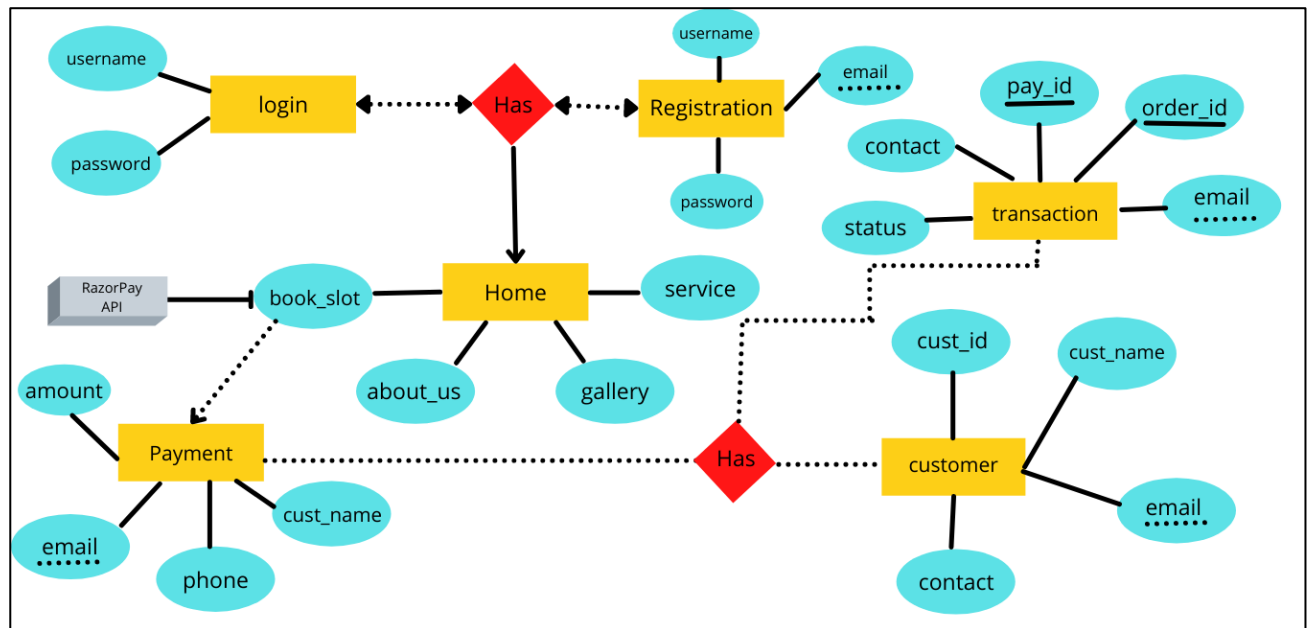

The 'Indexes' section shows no index defined.

OUTPUT

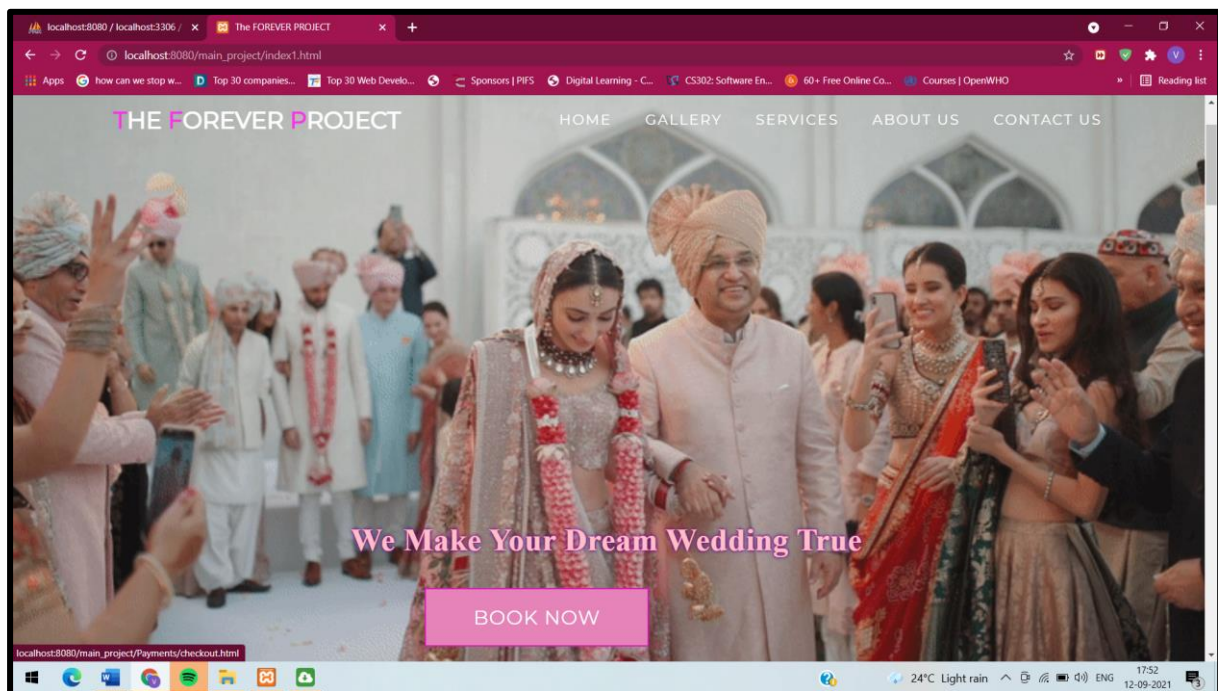

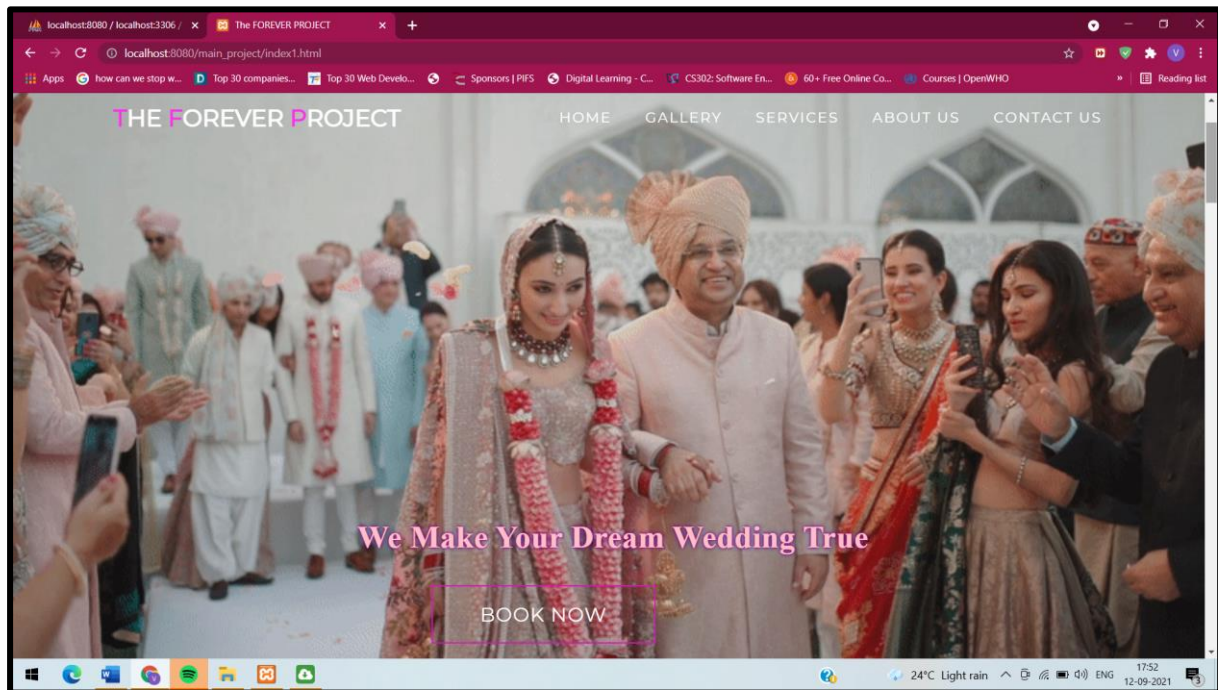

CODE: index.html

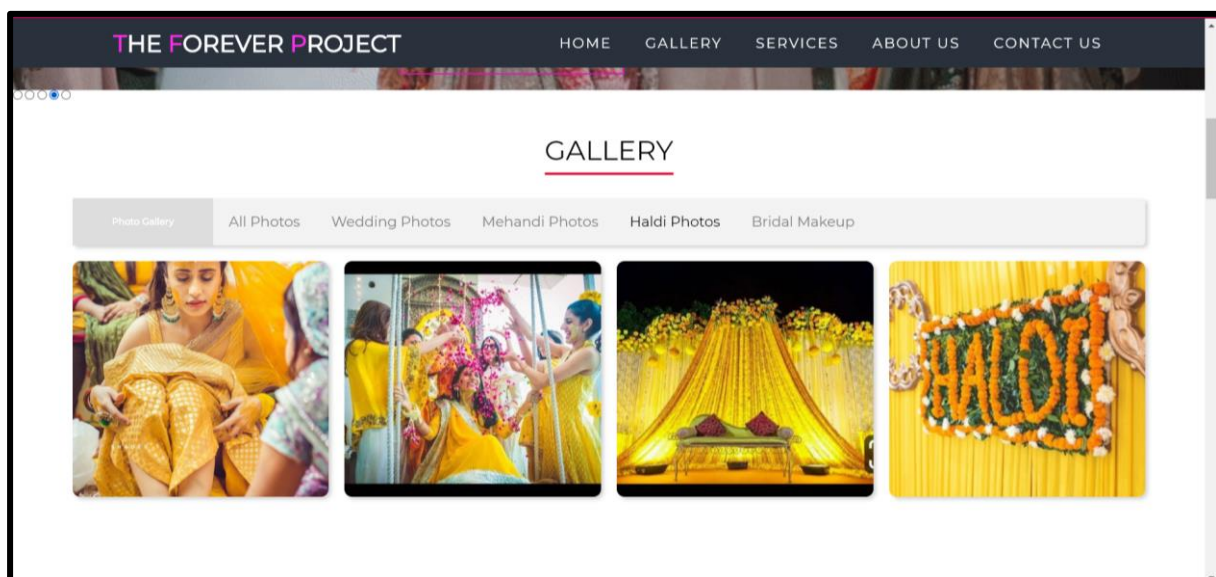

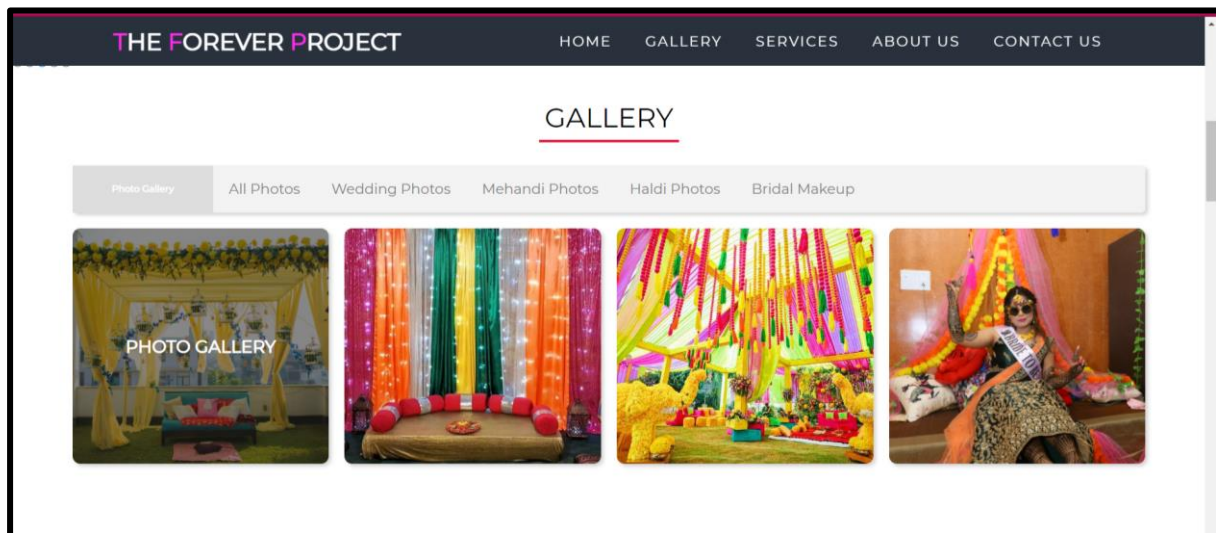

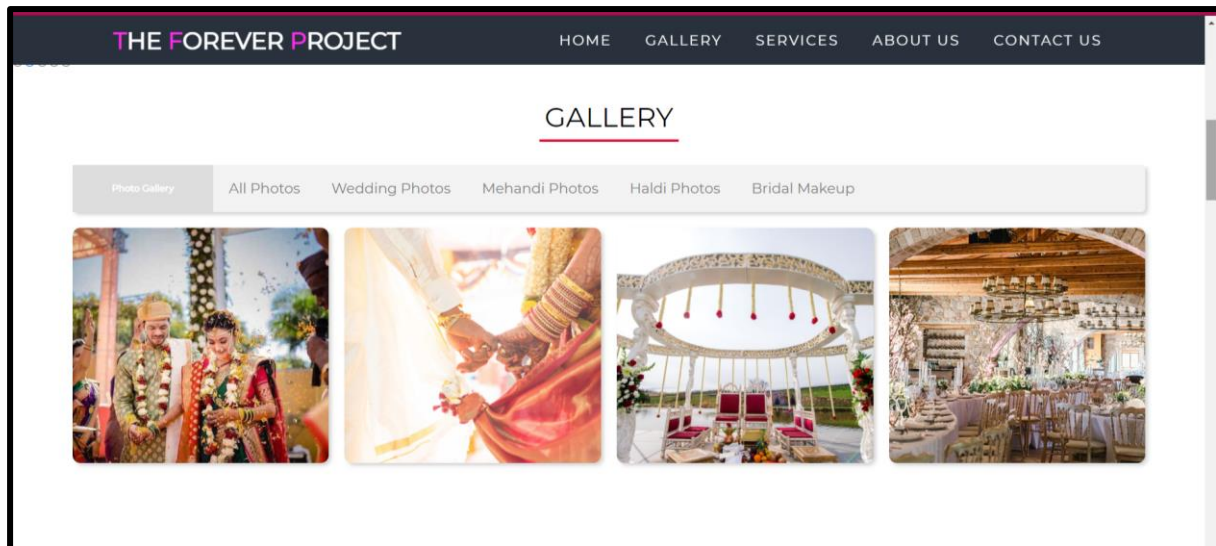

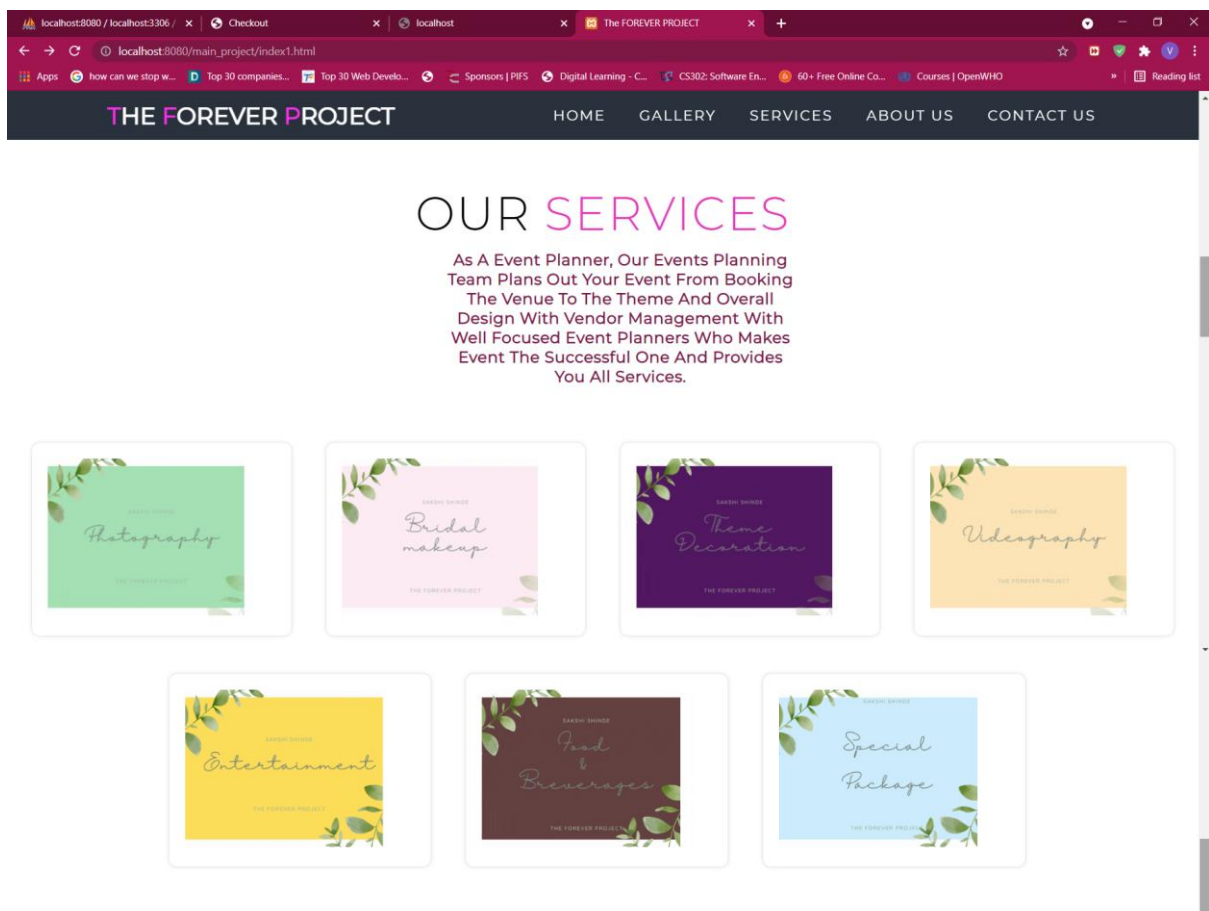

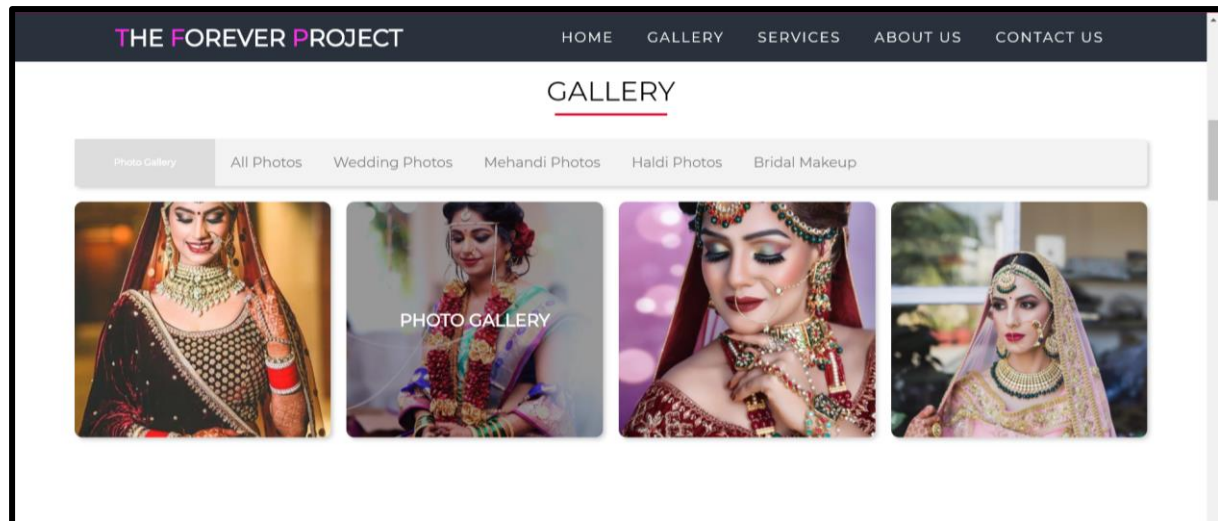

NAME: SAKSHI SHINDE

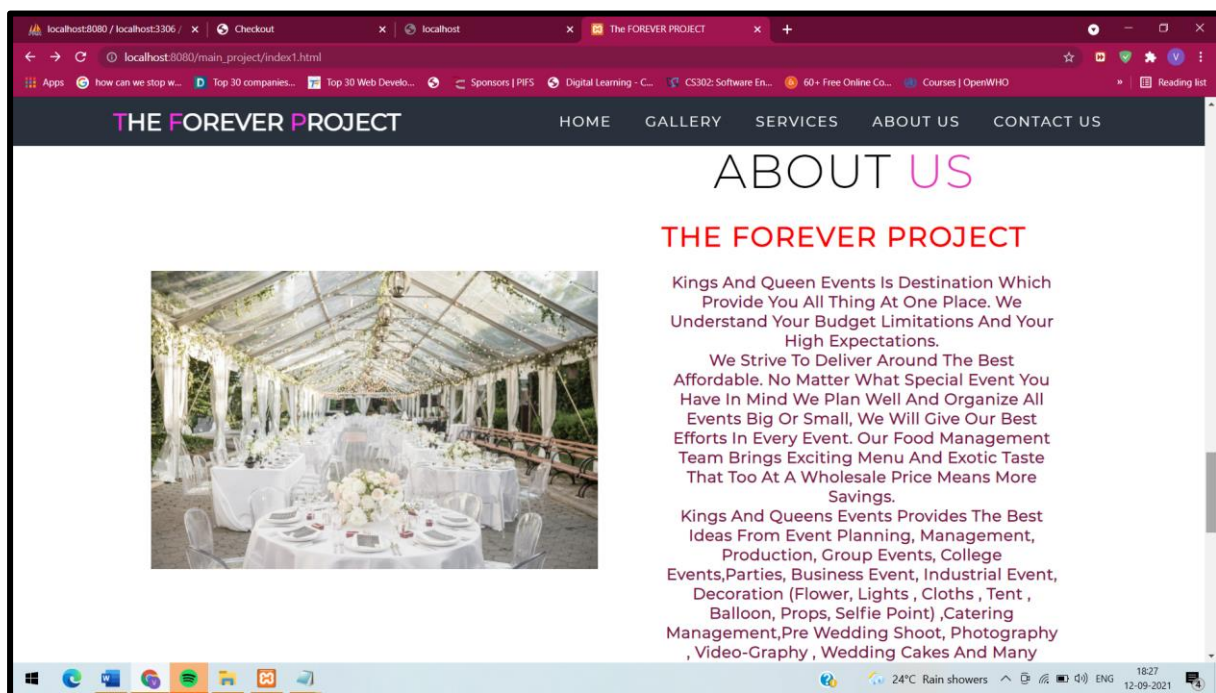

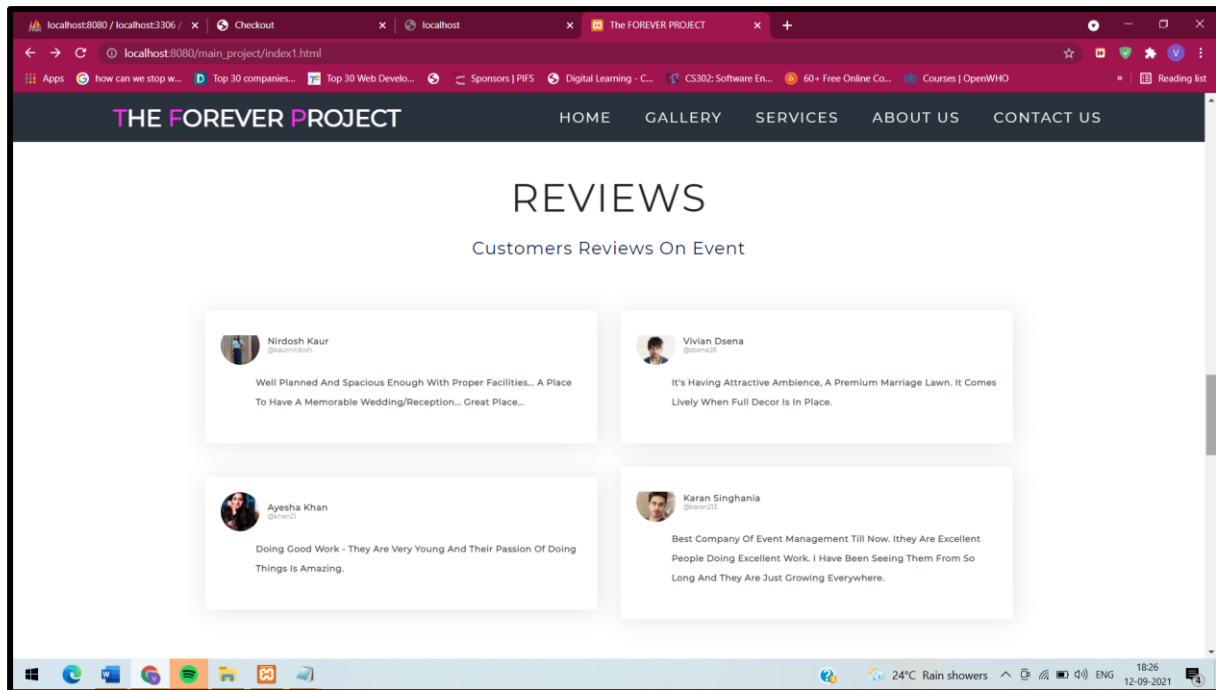

ROLL NO: 9227

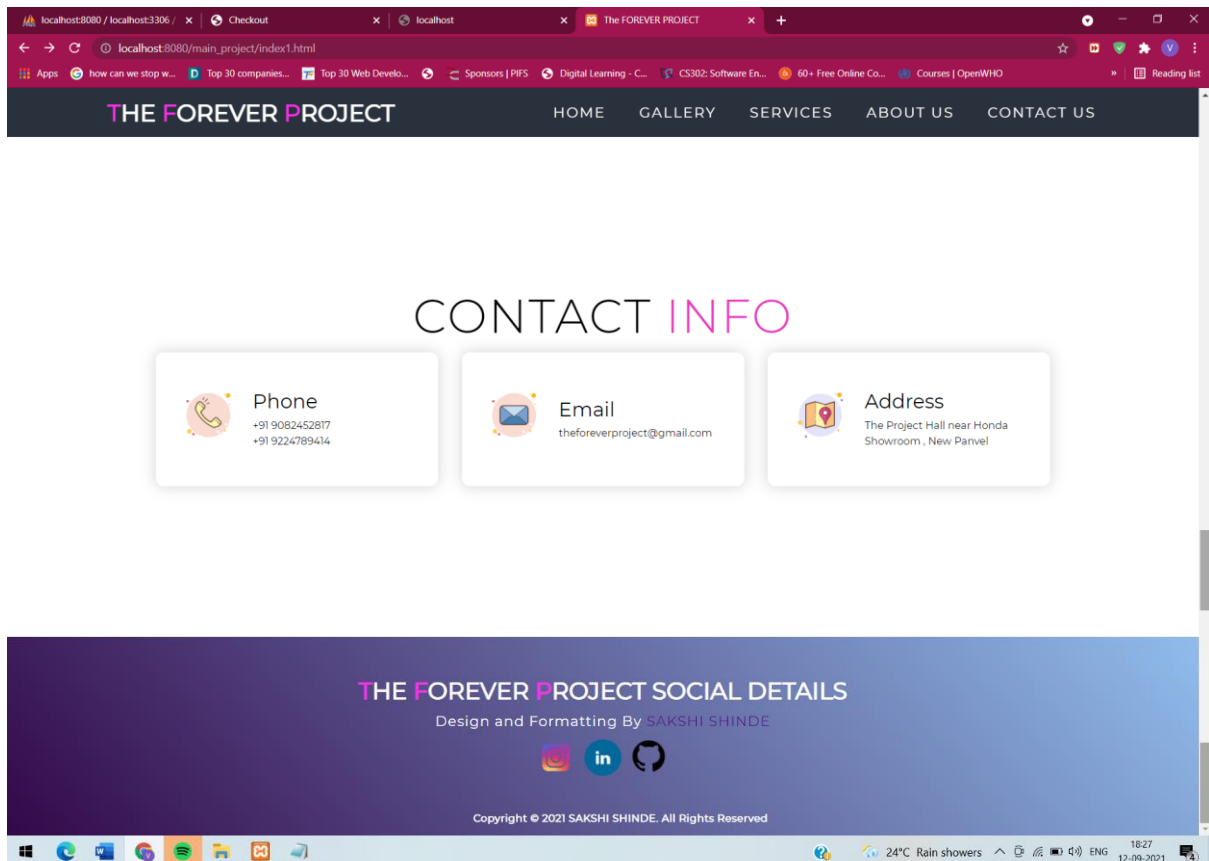

CODE: index1.html

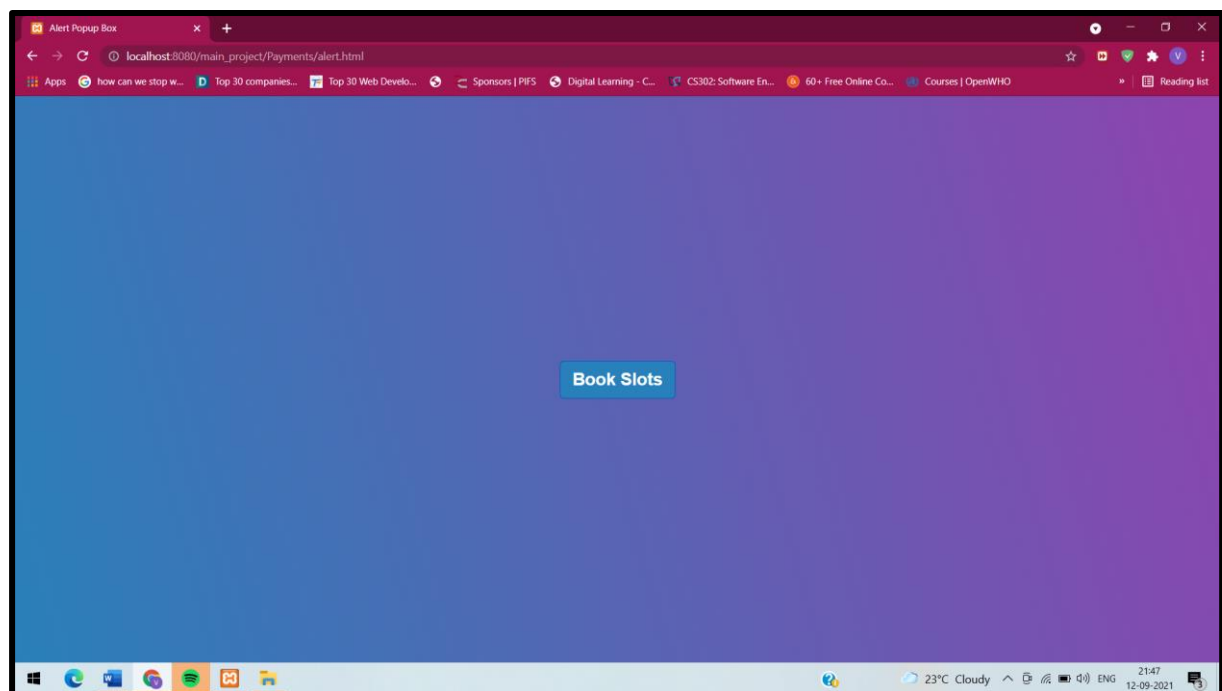

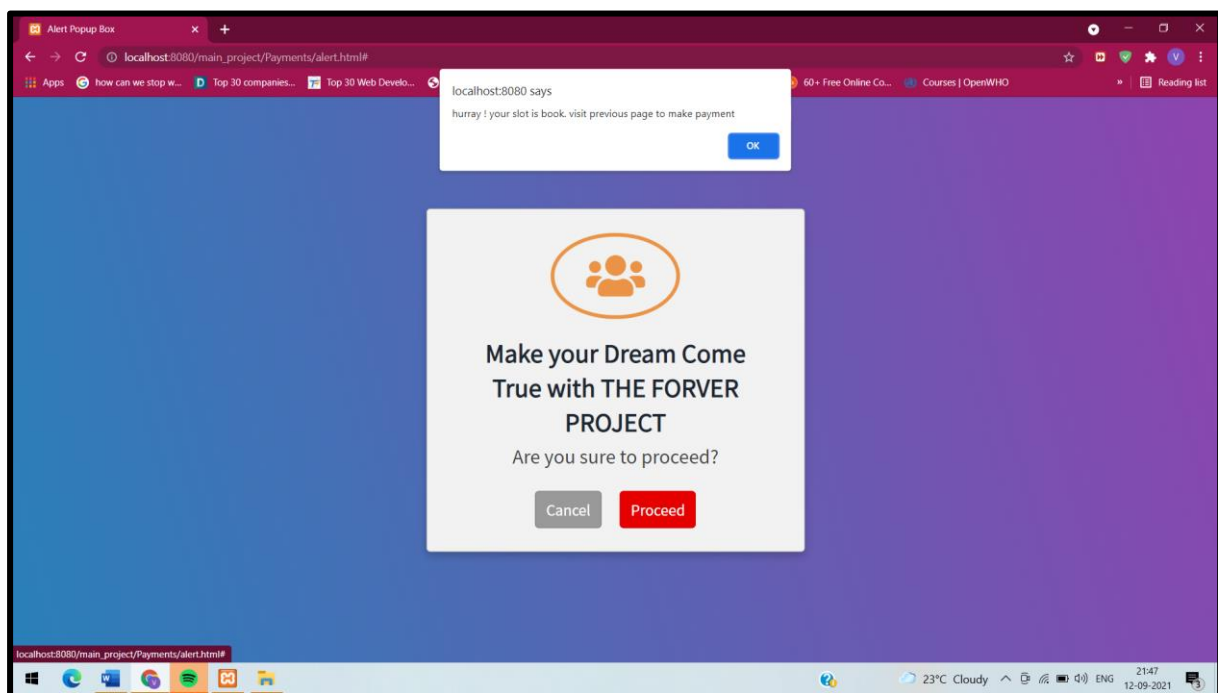

CODE: checkout.html

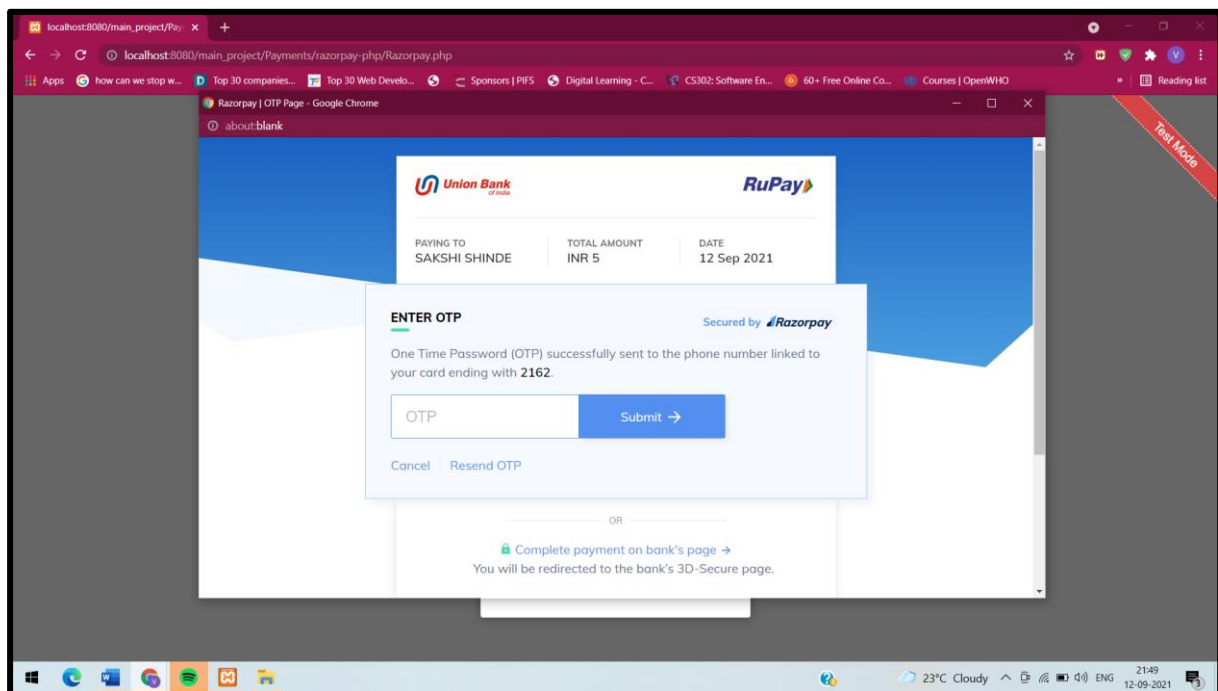

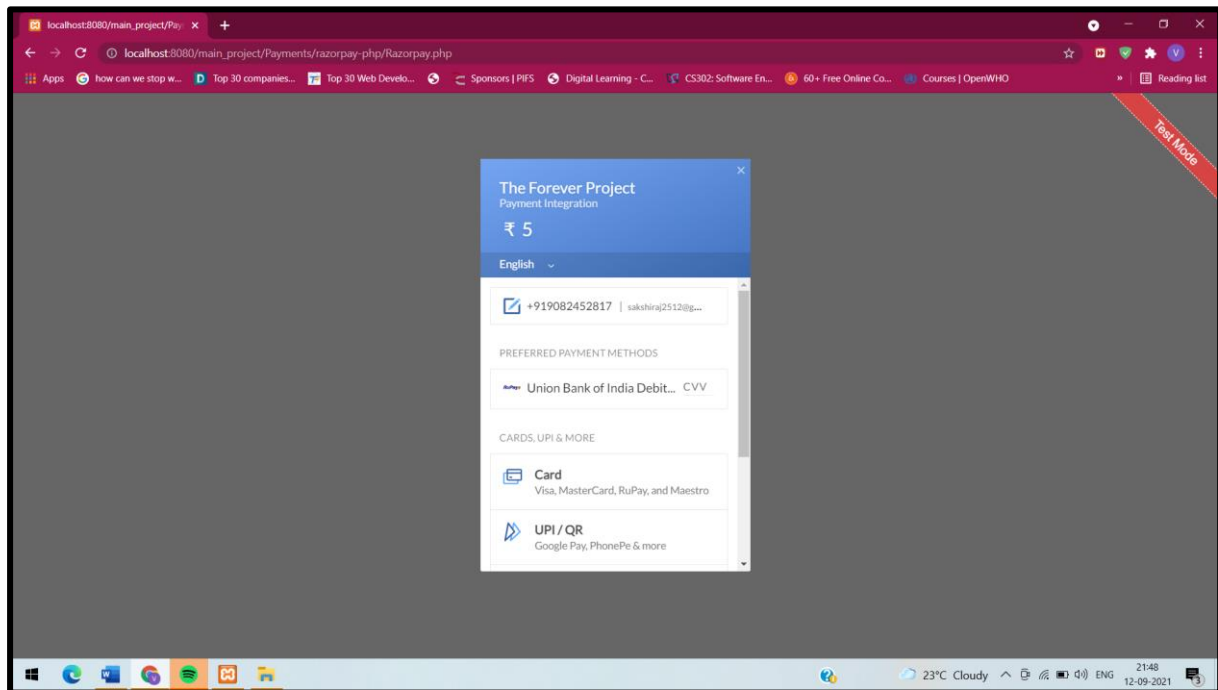

The screenshot shows a web browser window with the URL `localhost:8080/main_project/Payments/checkout.html`. The page has a light blue header with the title "Complete your Order". Below the header, there is a form with the following fields:

- Full Name:
- mobile:
- Email:
- Address:
- City:
- State:
- Zip:
- TotalAmount (in Rupees):

At the bottom of the form, there are two green buttons: "Confirm Order" and "Proceed to Pay".
